

### Relocation of Internal Medicine Clinic

Recently Frontier Medical Home moved into the hospital and now resides in the former location of the Internal Medicine Clinic. The new location of Internal Medicine is on the north side of the hospital. Patients coming into the main outpatient mall at the east entrance (near the Pharmacy) should walk straight down to the end of the main concourse, go thru the double doors, turn right and the Internal Medicine clinic is at the end of the hall on the left. It is more convenient to park in the north parking lot (off Thomas Road) and the clinic will be on the right as you come through the glass doors. If you are having any difficulty finding the clinic please ask someone at the information desk or a staff member at any of the front desks.
