

Secure Messaging

Secure messaging by RelayHealth is an online service that gives you another way to communicate with your Primary Care Manager & Nurse Team. You can avoid unnecessary trips to the clinic by contacting your team and receiving an answer within 24 hrs. The service allows confidential information to be exchanged between a patient and their PCM.

Secure Messaging is also a way to request appointments and medication renewals, ask questions of either the Medical Home Nurse or PCM, and to receive reminders of future appointments or scheduled testing.

To enroll ask the front desk staff or the nurse when you come in for a visit, or go to www.tricareonline.com
