

Fort Sill Tobacco Cessation Program

What you need to know:

- Research shows that people who use an FDA-approved tobacco cessation medication plus classes OR counseling are significantly more likely to be successful at quitting tobacco than if they try to quit without such aids.
- Medications available for tobacco cessation at RACH include: nicotine patches, nicotine gum, bupropion (Zyban), and varenicline (Chantix).
- Medications and classes/counseling are available to Service Members, Retirees, and Dependents. DA Civilians are eligible to attend tobacco cessation classes.
