April 2, 2015

Incoming Soldier
Warrior Transition Unit
4301 Wilson Street
Fort Sill, OK 7353

Dear Soldier,

Welcome to the Fort Sill, Warrior Transition Unit (WTU). As a member of the WTU, your mission is to heal as you transition back to duty or continue serving the nation as a veteran in the community.

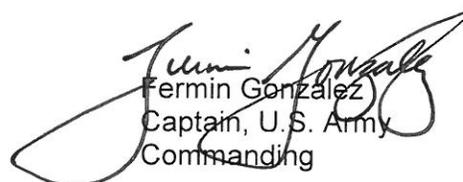

The mission of the WTU is to provide Mission Command for each Soldier who has suffered injury or illness while serving as a member of the US Army. We ensure Soldiers in Transition receive the appropriate medical care and administrative support for them to return to duty, reclassification into another Military Occupational Specialty (MOS) or return to their community and Families as an honored veteran with dignity and respect.

While here, you are required to attend all scheduled formations. It is your responsibility to be on time to all appointments. All Soldiers in the unit have duty work assignments based on their experience, skills and abilities, profile and transition goals as outlined in the Comprehensive Transition Plan Program. In addition, there are many educational opportunities available to Soldiers in the WTU.

The process of recovery is sometimes difficult and lengthy. Medical terminology can be technical and confusing. If at any time you do not understand what you have been told, ask for clarification. If the staff is not aware of your concerns, it is impossible to address your concerns. The best avenue to achieve this end is to develop continuous channels of two-way communication with cadre and medical staff. The cadre includes the Squad Leader, Platoon Sergeant, First Sergeant and Commander. If the issue needs to be raised to higher levels, it will be until resolution is achieved.

Whether you served at home or abroad, I personally thank you for your service as well as the sacrifices you and your Family have made to protect and defend our great nation.

Sincerely,

Fermin Gonzalez
Captain, U.S. Army
Commanding

*Welcome to the WTU.
We look forward to treating
you, help you recover and
a speedy transition
